

INDIAN MEDICAL ASSOCIATION
TAMILNADU
NEWS LETTER No. 15

“Dilli Chalo”

6th June 2017

Dear All,

It's a real warm Greeting from your mother organisation!

The weather is hot so also the professional atmosphere.

DILLI CHALO will be an event to be remembered for a long time.

It's for the meticulous way its been organised and for the demands at this crucial moment of our profession.

49 members are sparing their valuable time and money for the cause of the profession and for all who are back in our state and are requested to show their protest by putting their PEN DOWN from 10.00 am to 11.00 am on June 6th.

It's now or never for our profession.

The demands are given below. You may Print and post it in your clinic to create awareness for the public .

There are many more issues enlisted below with other possible suggestions.

1	Criminal prosecution of medical negligence and on clerical errors is not acceptable	Criminal prosecution of medical negligence and clerical error should be an exception and not a routine.
2	Capping the compensation in CPA on doctors	Compensation should not be based on the income of the person but on the formula used by DCGI in Clinical Drug Trial.
3	Professional autonomy in treatment and prescriptions	Safe guarding the interest of the patient by practising medicine based on social determinants of health and patient centric decisions.
4	Stringent central act against violence	Universal central act against violence similar to 18 States who have enacted in their States.
5	No unscientific mixing of systems of medicine	Ayush should be strengthened in its own field and not allowed back door entry in modern system.
6	Empower MBBS graduates	UG seats equal to PG seats and bringing back the concept of family doctors.
7	Bio-Medical Waste Policy & safeguarding the interest of small nursing homes.	Doctors owned small nursing homes should get due exemption.
8	One drug - One company - One price	Price of generic – generic, generic - trade, generic – brand from one company should be the same.
9	Implement inter- ministerial committee recommendations in six weeks	It is already late by 2 year.
10	Single window accountability	The State Medical Council or a Medical Tribunal is a solution.
11	Single window registration of doctors and medical establishments	This will reduce the cost of treatment and can be undertaken by the Health Ministry.
12	No to NMC: Amend IMC act to maintain professional autonomy	No regulatory mechanism can run with predominant nominated body.
13	Uniform final MBBS exam instead of 'NEXT'	Uniform final MBBS exam will ensure quality.
14	Uniform service conditions for doctors & faculty	This should be at a national level.
15	IMA member in every government health committee	Nirman Bhawan can give a room to IMA for fruitful functioning.
16	Central anti-quackery law	Every citizen of India has a right to receive quality and safe health care.
17	Reimbursement of emergency services for private sector	Emergency services are the responsibility of the State but they have no resources.
18	25000 family medicine PG seats	We need more family physicians this can be undertaken by MCI or NBE (DNB)
19	Health budget between 2.5 – 5 % with coming year for universal health coverage	This is to provide universal health coverage.
20	Aided hospitals and retainer ship in general practice	This will provide subsidised services to the middle class.

The following members from our state are representing you all at DELHI on the 6th June.

Dr. T.N.Ravisankar
Dr. J. A. Jayalal
Dr. N. Muthurjan,
Dr. K. Prakasam

Open Letter **Shri Narendra Modi Ji** *Hon'ble Prime Minister of India*

Respected Sir,

Greetings from the Indian Medical Association!

We would like to express our collective dismay at the unresponsiveness of our pleas for action against the increasing violence against doctors nationwide. This is the toughest period the medical fraternity is facing and we need your intervention at the earliest to safeguard our interest as also those of the society at large.

We are unable to serve the community with a free mind. We are sure our 'straight from the heart' points will get some attention in your 'man ki baat'.

Following are the areas we need addressed:

- ❖ Criminal prosecution towards medical negligence and clerical errors is not acceptable
- ❖ Capping the compensation in CPA on doctors
- ❖ Professional autonomy in treatment and prescriptions
- ❖ Stringent central act against violence on doctors
- ❖ Amendments in PC PNDT, Central CEA, West Bengal CEA Acts
- ❖ No unscientific mixing of systems of medicine
- ❖ Empowering of MBBS graduates
- ❖ One drug - One company - One price policy to be implemented in line with your Jan Aushadi Scheme
- ❖ Implement inter- ministerial committee recommendations in six weeks
- ❖ Single window accountability and registration of doctors and medical establishments
- ❖ No to NMC: Amend IMC act to maintain professional autonomy
- ❖ Uniform final MBBS exam instead of 'NEXT'
- ❖ Uniform service conditions for service doctors & faculty
- ❖ Same work - Same pay - Pay parity - No to adhocism
- ❖ Fair conduction of NEET exam
- ❖ Presence of an IMA member in every government health committee
- ❖ Central anti-quackery law
- ❖ Reimbursement of emergency services provided by private sector
- ❖ Introduction of 25000 family medicine PG seats
- ❖ Aided hospitals and retainership in general practice
- ❖ Health budget to be increased to 5% of GDP for universal health coverage
